Problem can't be a cable, firmware (updated on both cameras), or the computer, as quite obviously it would not come up (EOS WebCam Utility) as an option in Google Meet if those other components weren't working.. Tried connecting OBS with the EOS WebCam Utility for Mac with both my m50 and EOS-R.. Thanks in advance![Canon Eos Utility Download Mac Catalina](#)

Problem can't be a cable, firmware (updated on both cameras), or the computer, as quite obviously it would not come up (EOS WebCam Utility) as an option in Google Meet if those other components weren't working.. So I'm missing something in OBS Anyone have any ideas? Looking for help from anyone using an M50 with this, as that will be my main webcam.
